Investment Objective

The Fund aims to track the performance of the EURO STOXX 50® Index (before fees and expenses) thereby seeking to achieve long term capital growth. The Fund uses an 'index tracking' (also known as 'passive') investment management approach whereby it aims to replicate the composition of the index. However, for reasons such as liquidity or excessive cost, it may not always be practical for the Fund to invest in every company share in the index or at its weighting within the index. In order to manage the cash position, the Fund may invest in collective investment schemes (such as liquidity funds), including those managed by FIL Group, in addition to money market instruments, cash and deposits. As well as investing directly in company shares, the Fund will also achieve exposure indirectly through the use of derivatives for efficient portfolio management purposes, for example, at the time of cash inflows to remain fully invested or to reduce transaction costs.

Definition of Terms

Annualised Volatility is a measure of how variable returns for a fund or comparative market index have been around their historical average. Two funds may produce the same return over a period. The fund whose monthly returns have varied less will have a lower annualised volatility and will be considered to have achieved its returns with less risk.

Sharpe Ratio is a measure of a fund's risk adjusted performance taking into account the return on a risk-free investment. The ratio allows an investor to assess whether the fund is generating adequate returns for the level of risk it is taking. The higher the ratio, the better the risk-adjusted performance has been. If the ratio is negative, the fund has returned less than the risk-free rate.

A position combines all equity investments (including derivatives) linked to an issuing company. Derivatives are included on an exposure basis so they reflect the equivalent underlying shares needed to generate the same return. Geographic and sector breakdown tables are calculated using the positions methodology.

FIL Investment Management (Singapore) Limited [FIMSL] (Co. Reg. No.: 199006300E) is a responsible entity for the fund in Singapore. Prospectus of the fund is available from FIMSL or its distributors upon request. Potential investors should read the prospectus before investing. All views expressed and references to specific securities are included for illustration only, and should not be construed as an offer or recommendation. This document is for information only and does not have regard to the specific investment objectives, financial situation and particular needs of the person who may receive it. Potential investor should seek advice from a financial adviser before investing. If that potential investor chooses not to seek advice from a financial adviser, he should consider whether the fund is suitable for him. Past performance of the fund is not indicative of the future performance. Prices can go up and down. The value of the shares of the fund and the income accruing to them may fall or rise. Investors investing in a fund denominated in a non-local currency should be aware of exchange rate risk. The fund is not available to US citizens, residents or greencard holders.
