Index information

Market index: MSCI India Index Capped 8% (N)

Market index is for comparative purposes only. The same index is used in the positioning tables on this factsheet.

Index until 30 April 2009 was the MSCI India (G) Index and until 30 June 2011 was the MSCI India Index (with an 8% Cap). On 1 July 2011, the Index was changed to MSCI India Index Capped 8% (Net). The reason for the change is that a net index calculates performance net of withholding taxes which is more comparable with the calculation of the performance of the fund (also net of withholding taxes).

India Focus Fund

Factsheet as of 30 November 2017

Equity Exposure (% TNA)

The table below provides an overall view of the fund. This represents - in percentage terms - how much of the fund is invested in the market. The higher the figure, the more the fund will take part in any market rises (or falls).

	Exposure (% TNA)
Equity	98.1
Other	0.0
Uninvested Cash	1.9

Definition of terms:

Equity: the percentage of the fund that is currently invested in the equity market.

Other: the value of any non-equity investments (excluding cash funds) expressed as a percentage of fund TNA.

Uninvested cash: this is 100% minus the fund's Equity exposure and minus Other. This leaves any residual cash exposure that is not invested in shares or via derivatives.

% TNA: Data is presented as a percentage of TNA, which stands for Total Net Assets (the value of all the fund's assets after the deduction of any liabilities).

Definition of terms:

Index: the index used in the positioning tables on this page is the index on page 1 of this factsheet.

Sector/Industry Exposure & Country Exposure: These tables include the effect of derivatives where they can be linked to the underlying issuing company, otherwise they are included in the "Other Index / Unclassified" category. Derivatives are included on an exposure basis, and, where necessary are delta-adjusted. Delta-adjusting expresses derivatives in terms of the equivalent number of shares that would be needed to generate the same return. Where derivatives take the fund's total exposure to equity / sector / country over 100%, this will be incorporated in the tables above. The sector/industry classification used (ie Global Industry Classification Standard or Industry Classification Benchmark) varies by fund.

Top Positions: those companies in which the largest percentages of the fund's total net assets are effectively invested. Positions in other funds - including ETFs (Exchange Traded Funds) - can appear in this table, but index derivatives form part of an "Other Index / Unclassified" category which will not appear.
