### Warning:

Please note that dividend distribution is at the Manager's discretion, and it is dependent on prevailing market conditions and the income generated by the underlying securities of the fund. The dividends are not guaranteed. Past dividend yield does not represent the return of the fund and it is not indicative of future dividend yield. A high distribution yield does not imply a high return on the fund. Investors should not make any investment decision solely based on information contained in the table above. Investors should read the relevant offering document of the fund for further details including the risk factors before making any investment decision.

For certain Classes of Shares, the Manager has the discretion to pay dividends -

- 1) out of gross income while fees/charges may be charged to capital of the fund; or
- 2) directly out of capital if the net income generated by the fund is insufficient to pay a distribution as declared.

Investors should note that the payment of dividends directly out of capital represents a return or withdrawal of part of the amount they originally invested or from any capital gains attributable to the original investment. Such distributions will reduce the future appreciation of the fund and will immediately reduce the net asset value of the fund.

### Calculation methodology:

1. "Net distributable income" means net investment income attributable to a share class and does not include realized gains/capital gains (i.e. dividend income and interest income net of fees and expenses only). Any "distributable income" not distributed will be carried forward to the next distribution period(s) within the same financial year. "Distributable income" not distributed by the end of the financial year will be treated as "capital" for the next financial year. "Net distributable income" for the purpose of this Dividend Composition Information does not include any income equalisation adjustments.
2. Including capital gain.
3. "Underlying portfolio yield" means the annualised percentage measure of interest and dividend income earned by the portfolio net of fee and expenses. It is computed based on audited accounts.
4. "Average payout yield" means the annualised rate of return of the dividends paid to shareholders since inception. For share classes that have been incepted for less than 1 year, it is calculated on a cumulative basis.
5. For share classes that have been incepted for less than 1 year, the average distribution is calculated on a cumulative basis.
6. "Annualised Volatility" is calculated over a 3-year period.
