KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in an open-ended investment company established in Luxembourg, the assets of which are held in different sub-funds. Each sub-fund is a separate portfolio of securities managed in accordance with its specific investment objective.
- For Class A (hedged) Shares, dividends will normally be declared on a yearly basis on the first Business Day of August. For Class A-ACC and Class Y-ACC Shares, no dividends will be paid. All interest and other income earned on the investment will be retained in the Sub-Fund. For Class A-HMDIST(G) (hedged) Shares, the Board expects to recommend distribution of substantially the whole of the respective gross investment income for the period. The Board may also determine if and to what extent dividends may include distributions from capital. Such distributions may include a premium when the interest rate of the hedged currency is higher than the fund's reference currency interest rate. Consequently when the interest rate of the hedged currency is lower than the fund's reference currency interest rate, the dividend may be discounted. Dividends are normally declared on the first Business Day of each month. For Class A-MDIST Shares, dividends will normally be declared on a monthly basis on the first Business Day of the relevant month. For Class A-MINCOME(G) Shares, dividends will normally be declared on the first Business Day of each month. The Directors expect to recommend distribution of substantially the whole gross investment income amount for most of the time, and from capital on occasion so as to seek to maintain, so far as is reasonable, a stable payment per Share which should not have over the long term a positive or negative impact on capital. For Class Y-QDIST Shares, dividends are normally declared on the first Business Day of February, May, August and November. Dividends are normally paid within five Business Days of the relevant month, or as soon as practicable thereafter. Dividends are not guaranteed and are paid at the discretion of the Directors.

Refer to "Dividends" section of the Luxembourg Prospectus for further information on the dividend payout of the Sub-Fund.

Product-Specific Risks

You are exposed to Investment Grade Risk

- The Sub-Fund's investments in investment grade debt securities involve credit risk and may be subject to ratings downgrades by the rating agencies in the period between their issuance and maturity, which may affect the Sub-Fund's NAV.

You are exposed to Distribution out of Capital Risk

- For certain Classes of Shares, dividends may be paid out of capital where the income/capital gain generated by the Sub-Fund is insufficient to pay a distribution as declared. This represents a return or withdrawal of part of the original investment or from any capital gains attributable to the original investment. Such distributions may result in an immediate decrease in the Sub-Fund's NAV per Share.
- The distribution amount and NAV of the A-HMDIST(G) hedged Share class may be adversely affected by differences in the interest rates of the reference currency of the hedged Share class and the Sub-Fund's base currency, resulting in an increase in the amount of distribution that is paid out of capital and hence a greater erosion of capital than other Share classes.

You are exposed to Derivatives Risk

- The use of financial derivative instruments may give rise to leverage, liquidity, counterparty and valuations risks at times. In adverse situations, the Sub-Fund's use of derivative instruments may become ineffective and the Sub-Fund may suffer significant losses.

You are exposed to Credit Rating Risk

- Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times.
