## Product-Specific Risks

### **You are exposed to Bonds, Debt Instruments & Fixed Income, Lower Rated/ Unrated Securities & Credit Risks**

- The value of bonds and debt instruments will fluctuate depending on market interest rates, the credit quality of the issuer and liquidity considerations.
- Medium-, lower-rated and un-rated securities may be subject to wider fluctuations in market values than higher-rated securities.
- Credit risk arises from the uncertainty about the ultimate repayment of principal and interest.

### **You are exposed to Emerging Markets Risks**

- The Sub-Fund invests in emerging market securities and the price of these securities may be more volatile than those of securities in more developed markets.
- This volatility may stem from political and economic factors and be exacerbated by legal, trading liquidity, settlement, transfer of securities and currency factors.
- Although care is taken to understand and manage these risks, the Sub-Fund and accordingly the shareholders in the Sub-Fund will ultimately bear the risks associated with investing in these markets.

### **You are exposed to Emerging Markets (Russia only) Risk**

- The Sub-Fund invests in Russia and it is understood that under current Luxembourg regulations, the Sub-Fund may invest not more than 10% of its net assets in unlisted securities not dealt on a regulated market. Some investments in Russian securities may be considered as falling within such limit.
- The Russian market presents specific risks in relation to the settlement and safekeeping of securities as well as the registration of assets where registrars are not always subject to effective government or other supervision.

### **You are exposed to Derivatives Risk**

- Although the Sub-Fund will not make extensive use of financial derivative instruments for investment purposes or use complex derivative instruments or strategies to meet the investment objectives of the Sub-Fund, the use of financial derivative instruments may give rise to leverage, liquidity, counterparty and valuations risks at times. In adverse situations, the Sub-Fund's use of derivative instruments may become ineffective and the Sub-Fund may suffer significant losses.

### **You are exposed to QFII Risks**

- The Sub-Fund may invest in onshore China fixed income securities and may incur losses due to limited investment opportunities, or may not be able to fully implement or pursue its investment objectives or strategy, due to QFII investment restrictions, illiquidity of the onshore China fixed income securities market, and/or delay or disruption in execution of trades or in settlement of trades.
